

Compact Mini

The Affordable Pocket Video Magnifier

- ▶ 3.5" LCD pocket size video magnifier
- ▶ Ultrathin .6" x 2.9" wide x 3.5" long
- ▶ Weighs only 4.7 ounces
- ▶ 2x - 11x magnification (3 sizes)
- ▶ Built-in tilt-angle viewing stand
- ▶ 3.5 hour rechargeable lithium battery

Weighing a mere 4.7 ounces, the ultrathin Compact Mini is the smallest and lightest 3.5" LCD pocket video magnifier available. Prop up the built-in tilt stand, then slide the Mini across the reading document, or hold Mini with your fingertips and view from above the reading material. Compact Mini is the ideal pocket video magnifier for the active and independent person with low vision. Read the menu in a restaurant, a price tag or shelf price in a store, the label or ingredients on a bottle or can, browse a magazine in a store or library, find a file folder in a file cabinet, and other "what is it?" reading tasks. Take Compact Mini with you anywhere. It conveniently fits in your pocket or slips into your purse.

Compact Mini has all the basic features you need, with a simple three button design. Adjust the magnification by the Size button or distance, select the most comfortable reading mode (Color, B/W, Reverse, yellow-on-blue or yellow-on-black), or freeze the image with the Snapshot button and magnify or change the image mode for enhanced clarity. For longer reading comfort, prop up the reading stand so Compact Mini's 3.5" LCD screen tilts at a comfortable viewing angle. After use, easily collapse the tilt stand, then slip it into its slim padded softcase.

Compact Mini is truly the ultimate "mini" video magnifier to take with you everywhere you go.
